Mechanical engineer turned UX Designer, I bring a systems-thinking and analytical approach to solve complex, technical problems. I design end-to-end solutions grounded in UX research, collaboration, and rapid iteration, creating intuitive experiences that balance user needs with business outcomes.

WORK EXPERIENCE

DigitalOcean (Cloud Infrastructure, B2B/B2C)

Senior Product Designer, Growth, Oct 2024 - April 2026

- Designed signup, onboarding, and growth experiences, including a blue-sky redesign that accelerated time-to-value and increased product activation by +6.3%
- Set business KPIs for high spend customers and created a roadmap to grow count and spend of this cohort via playbooks based on qualitative and quantitative data
- Conducted and analyzed 5+ research initiatives to discover user pain points related to onboarding and product usage, make UX recommendations, and inform & validate design decisions
- Authored a design guide for integrating AI agents, inference, and smart suggestions into the platform, establishing cohesive styling, components, interaction patterns leveraging systems design

LogRhythm (Enterprise cybersecurity SaaS, B2B)

UX Designer III, April 2024 - September 2024

UX Designer II, April 2022 - April 2024

UX Designer I, September 2020 - April 2022

- Designed enterprise cybersecurity software including rule builders, data processing workflows, and data dense UIs
- Lead over ten large scale design projects, successfully driving them from conception and refinement to implementation
- Created user flows, wireframes, and high fidelity designs to drive collaboration with product management, engineering, and users
- Conducted and analyzed 15+ onsite and remote user research sessions

Stich Spaces

Co-Founder, Head of Design & Development, March 2023 - Dec 2024

- Founded start up rental marketplace that connects businesses and customers looking to rent unique spaces for events and activities
- Designed over 10 website pages including the marketplace, business location page, FAQs, account profile, and booking
- Developed UI and wrote over 100 backend workflows for database architecture, check out, account management, and scheduling
- Integrated eight APIs for check out and geolocation functionality

EDUCATION

University of Michigan

M.S. User Experience & Product Design (Design Science)

University of Wisconsin, Madison

B.S. Mechanical Engineering

Cert: Integrated Studies in Science, Engineering, and Society

Study Abroad: Denmark Technical University, Denmark

SKILLS

UX Design

User Research

Qualitative & Quantitative Data Analysis

User Workflows

Light Business KPIs & Roadmapping

Creating Business Cases for UX

Wireframing

UI Design

Design Systems

Responsive Design
